ADVANCES IN BRAIN RESUSCITATION

Book Condition: New. Publisher/Verlag: Springer, Berlin | Brain resuscitation is the therapeutic intervention for critically ill patients with severe brain damage, particularly the types caused by ischemia and hypoxia. The objective of the International Symposium on Brain Resuscitation held in Ube, Yamaguchi Japan October 31 to November 2 1988, and sponsored by Yamaguchi University and the Japanese Ministry of Education, was to review our recent progress in brain resuscitation and to discuss controversies both basic and clinical. To my knowledge, this symposium was the first held in Japan. Our understanding of neuronal dysfunction due to ischemic/hypoxic insults at organ, cellular, and molecular levels has advanced significantly in the last two decades. We had therefore intended that this international symposium should broadly cover the topics which are of interest to both basic researchers and clinicians. Three hundred and twenty-five attendants, including twenty scientists from eight different countries, actively participated in discussion and exchange of new ideas and thoughts concerning brain resuscitation. This book comprises the reports presented during the symposium which consisted of two main parts: basic and clinical. Although one single meeting can never be expected to solve any problems, meetings often highlight areas of ignorance and problems which are ripe for solving. It has been hard to review all the papers because of the multiplicity of the discussed topics, but the overview on brain resuscitation by Professor Bo K. Siesjo and the summary by Professor J. | I: Basic Aspects.- 1. Brain Resuscitation: Yesterday, Today and Tomorrow.- 2. Glutamate Neurotoxicity and Ischemic Neuronal Damage.- 3. Are Glutamate/Aspartate Antagonists Protective in Cerebral Ischemia?.- 4. N-Methyl D-Aspartate Excitotoxicity: Is It Important in Ischemic Neuronal Injury?.- 5. Metabolic Derangement and Cell Damage in Cerebral Ischemia with Emphasis on Protein and Nucleic Acid Metabolism.- 6. Protein and Polyamine Metabolism...
