

Electroconvulsive and Neuromodulation Therapies (Hardback)

By -

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2009.

Hardback. Book Condition: New. 257 x 178 mm. Language:

English . Brand New Book. Electroconvulsive therapy (ECT) is a

psychiatric treatment involving the induction of a seizure

through the transmission of electricity in the brain. Because of

exploitation movies and greatly heightened drug company

promotional activities ECT was used less frequently in the 1980s

and 1990s. Eventually these movies were understood as

unrealistic. Now these drugs are increasingly recognized as

dangers to body health. Because of recent refinements and a far

better scientific understanding of the clinical procedures and

mechanisms underpinning ECT, this treatment modality has

seen a resurgence in use and widespread appreciation of its

safety. This book is the new definitive reference on

electroconvulsive and neuromodulation therapies. It

comprehensively covers the scientific basis and clinical practice

of ECT as well as comparisons between ECT and medication

therapies including the new generation of antipsychotic drugs. It

also provides readers with administrative perspectives and

specific details for the management of this modality in clinical

practice. The new forms of nonconvulsive electrical and

magnetic brain stimulation therapy are also covered in detail, in

a separate section. The chapter authors are leading scholars

and clinicians.
