THERMODYNAMIC AND ONE-DIMENSIONAL KINETIC SIMULATIONS APPLIED TO MATERIAL INTERFACES PRODUCED VIA POWDER METALLURGY PROCESSES

Shaker Verlag Aug 2011, 2011. Taschenbuch. Book Condition: Neu. 211x149x15 mm. Neuware - The joining of different materials into one part is an advantageous method to combine different properties in high technology components designed for special applications. For the production of these parts, various methods can be applied, for example the powder metallurgy. Powders can be sintered together or onto dense surfaces, thus combining materials with different chemical compositions. Due to their chemical potential and atomic mobilities, they form interfaces,...
