Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Biological Atlas: A Guide to the Practical Study of Plants and Animals It is now generally recognised that a certain acquaintance with actual specimens is necessary for the proper understanding of Plants and Animals. By the practical study of representative forms, exemplifying the leading modifications of plant and animal life, the student obtains a basis of distinctly observed fact with which to compare other forms, and round which to cluster the information derived from books. The University of London has given practical shape to this idea by selecting a series of common types which each candidate must be prepared to examine microscopically, to dissect and to describe. In this Atlas, which is intended to serve as a guide to, and not as a substitute for, practical work, drawings are given of the various points of importance exemplified by each of these types, to enable the student to make out the points for himself on the actual specimens. Experience both as students and teachers has taught us, that in this constant appeal to the object itself,...
